The Circuit Breaker and Recloser Testing Specialist

## Circuit Recloser **SEMINAR**

Zensol Automation Inc. invites you to participate in a one day seminar on the importance of circuit recloser testing.

The seminar will touch the following points :

Presentation of reclosers, testing and measurements per ANSI C37.61-1973 and IEEE std.321-1973 international standards.

- Recloser characteristics
  - Lock-open function
  - Operating sequence
  - Protection curves
  - Time-current characteristics curves
- What is a recloser
- What is a GEN-3/12
- GEN-3 Measurement methods and introduction to GEN Win Software.
- Practical exercises on GENWIN and examples.

The seminar will be divided in two sessions:

- The morning session will cover the theory involved on real testing
- The afternoon session will be hands on exercises with the use of GENWIN software

For this reason we ask attendees to bring their laptop to the seminar.
