June 16, 2009

To Whom It May Concern:

While it is AEP's policy not to endorse manufacturers or products, the Zensol CBA-32P circuit breaker timing test set was used to test several 800kv air blast breakers on the AEP system in the Roanoke Transmission Region. AEP Roanoke Transmission Employees are very satisfied with the performance of the test equipment and the CBA-32P is another approved circuit breaker timing test set for use on the AEP Transmission System.

Sincerely,

A handwritten signature in blue ink that reads "Michael L. Skidmore".

Michael L. Skidmore, PE  
Senior Engineer
